

Enterprise Nexus - Multi-Agent AI Business Automation OS

Feature Screenshots

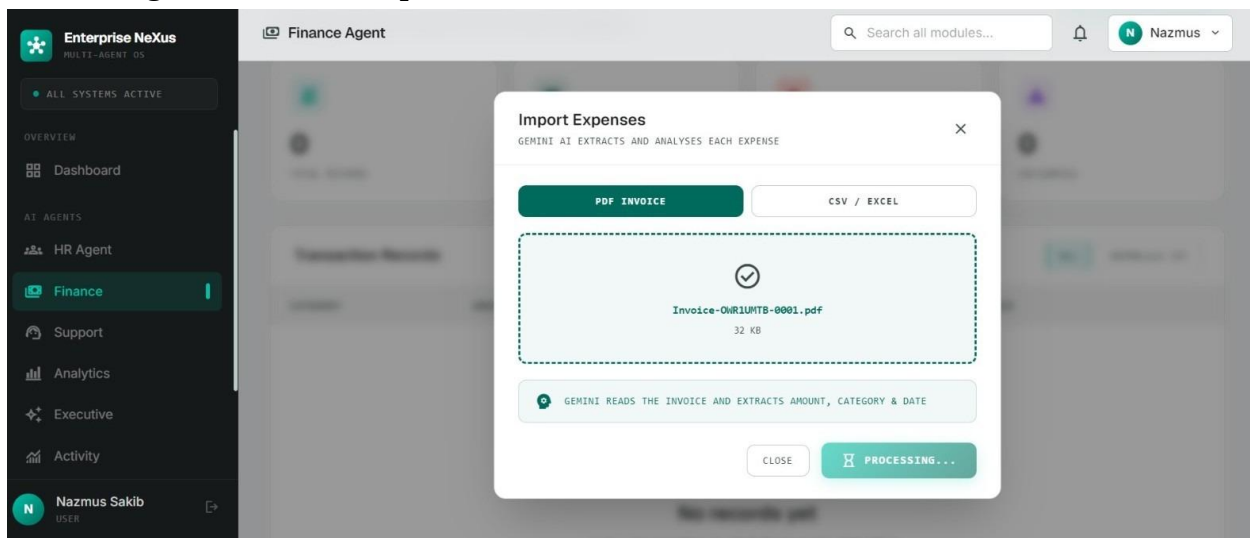

CSE4204-8B-T04 | Integration Week (09)

HR Agent — Overview

HR Agent dashboard showing AI-powered CV screening results. The AI evaluates the uploaded candidate profile and produces an AI score, confidence level, and a shortlist/reject recommendation.

Finance Agent — Invoice Import

The 'Import Expenses' feature: Gemini AI reads an uploaded PDF invoice and automatically extracts the amount, category, and date, removing the need for manual data entry.

Support Agent — New Ticket

The screenshot shows the 'New Support Ticket' form in the Enterprise NeXus interface. The form is titled 'New Support Ticket' and includes a sub-header 'AI WILL ANALYSE SENTIMENT AND URGENCY'. The main input field is labeled 'DESCRIBE YOUR ISSUE' and contains the text 'hello,, worst delivery ever'. Below the input field, there are three sections: 'WHAT GEMINI AI WILL DO', 'SENTIMENT' (positive / neutral / negative), 'URGENCY' (low / medium / high), and 'AUTO REPLY' (generates a response). The form also has a 'CANCEL' button and an 'AI ANALYSING...' button. The interface includes a sidebar with navigation options like Dashboard, HR Agent, Finance, Support, Analytics, Executive, and Activity. The user profile 'Nazmus Sakib' is visible in the top right corner.

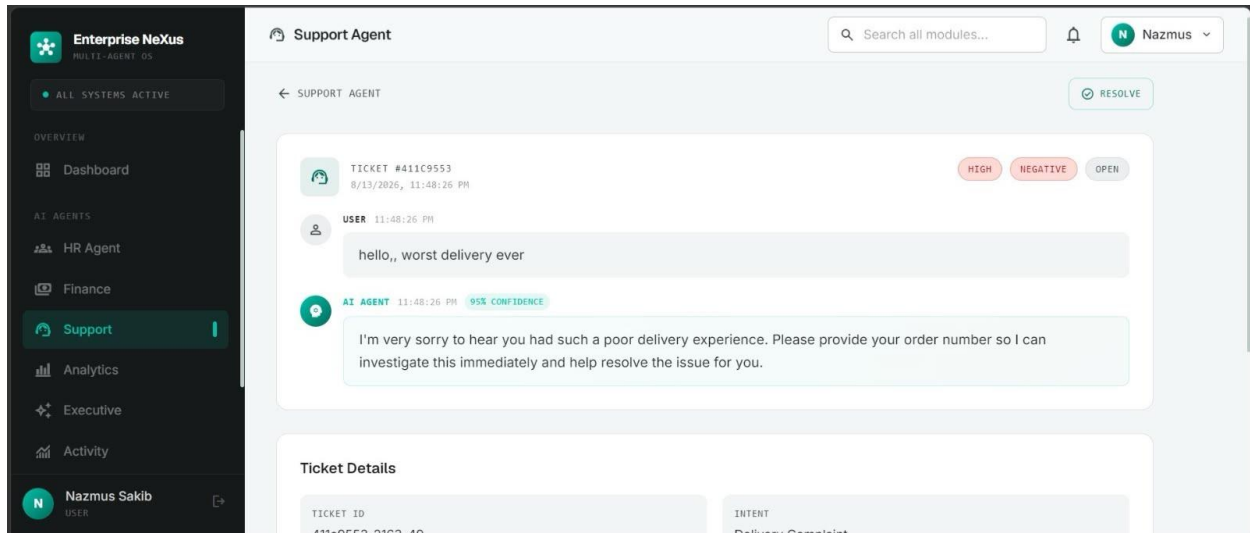

The 'New Support Ticket' form. Before the ticket is submitted, Gemini AI analyses the described issue to determine sentiment (positive/neutral/negative) and urgency (low/medium/high), and drafts an auto-reply.

Support Agent — Overview

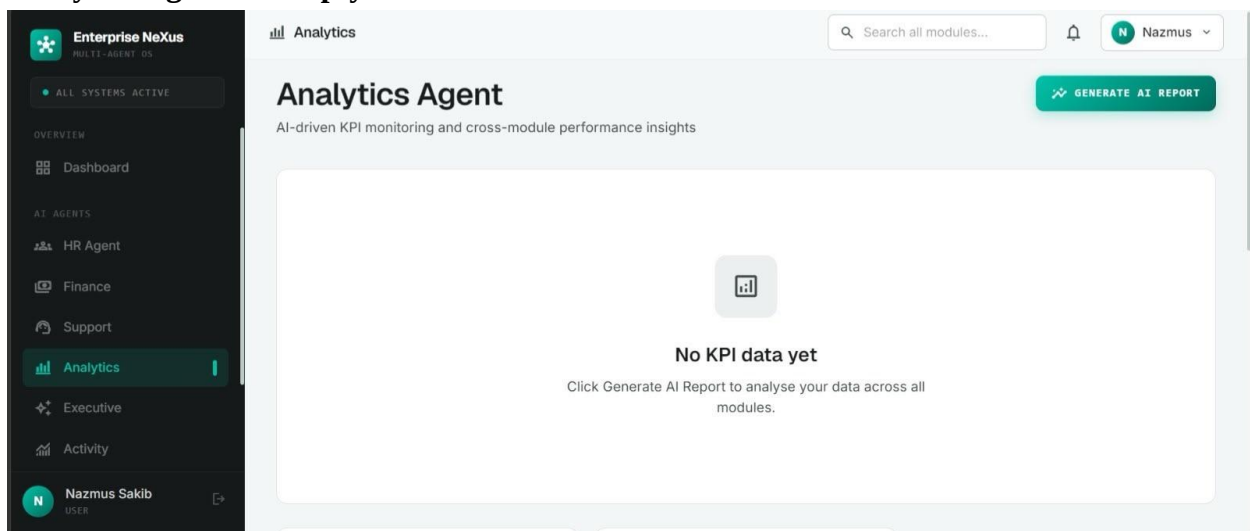

Support Agent dashboard showing live ticket statistics (open, resolved, escalated) and the AI-generated auto-reply for a newly submitted, escalated ticket.

Support Agent — Ticket Conversation

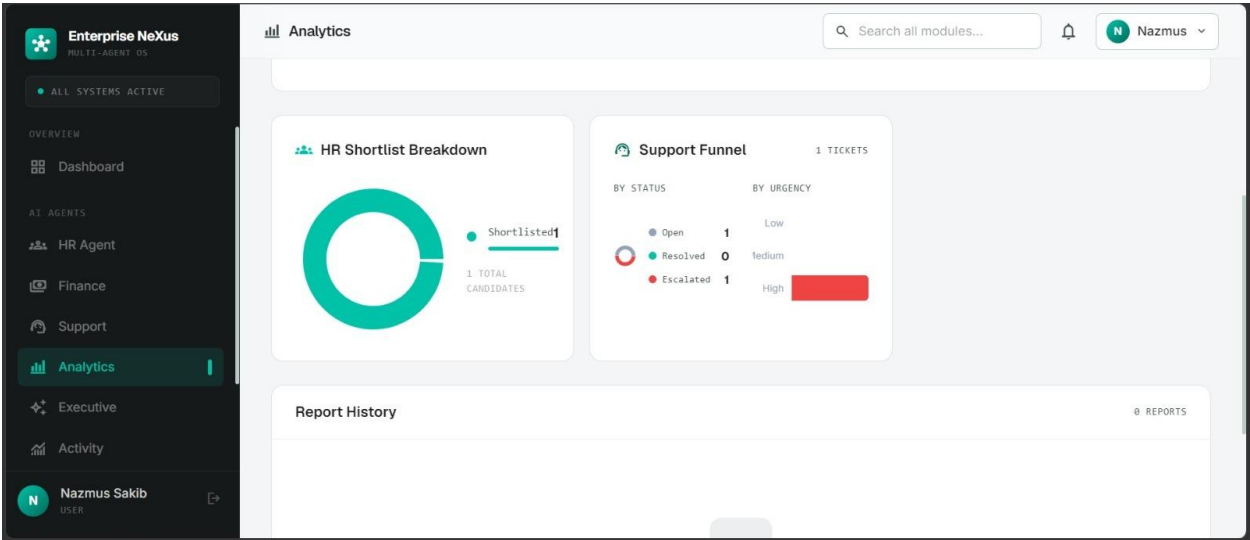

Full ticket conversation view showing the user's message and the AI agent's auto-generated response, along with its confidence score, sentiment, and urgency classification.

Analytics Agent — Empty State

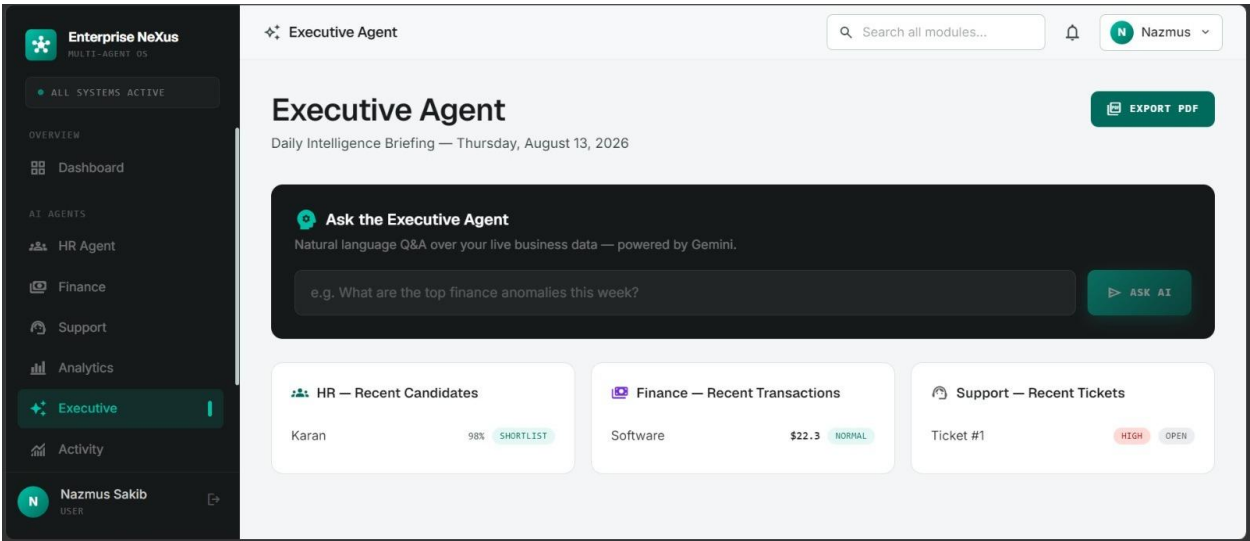

Analytics Agent's initial state before a report has been generated, prompting the user to click 'Generate AI Report' to analyse data across all modules.

Analytics Agent — Generated Report

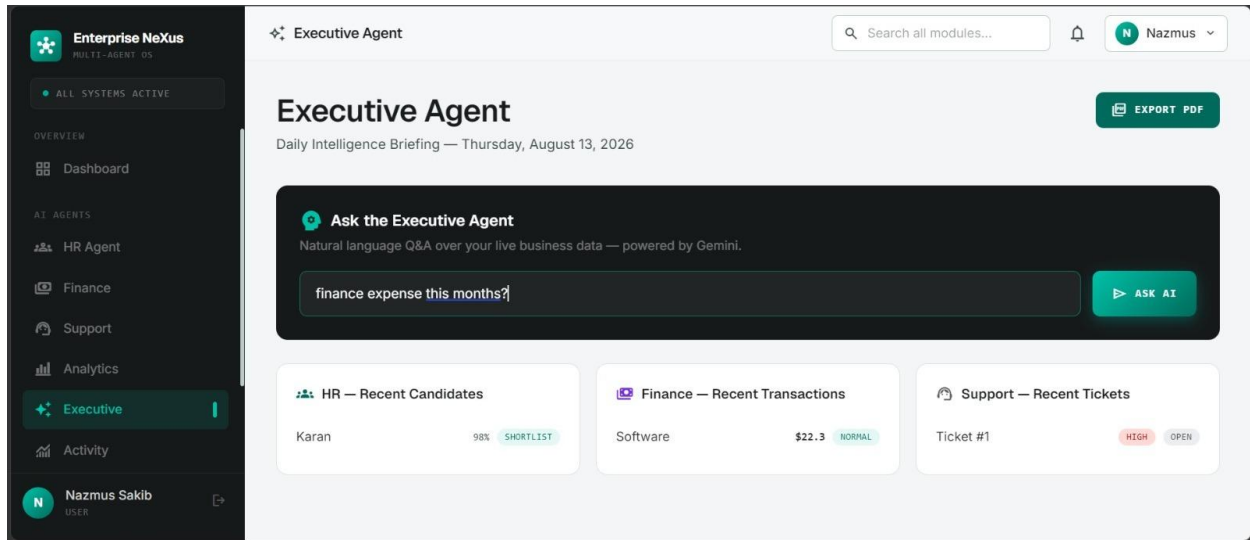

AI-generated analytics report showing an HR shortlist breakdown and a support ticket funnel, giving cross-module performance insights derived by the AI.

Executive Agent — Overview

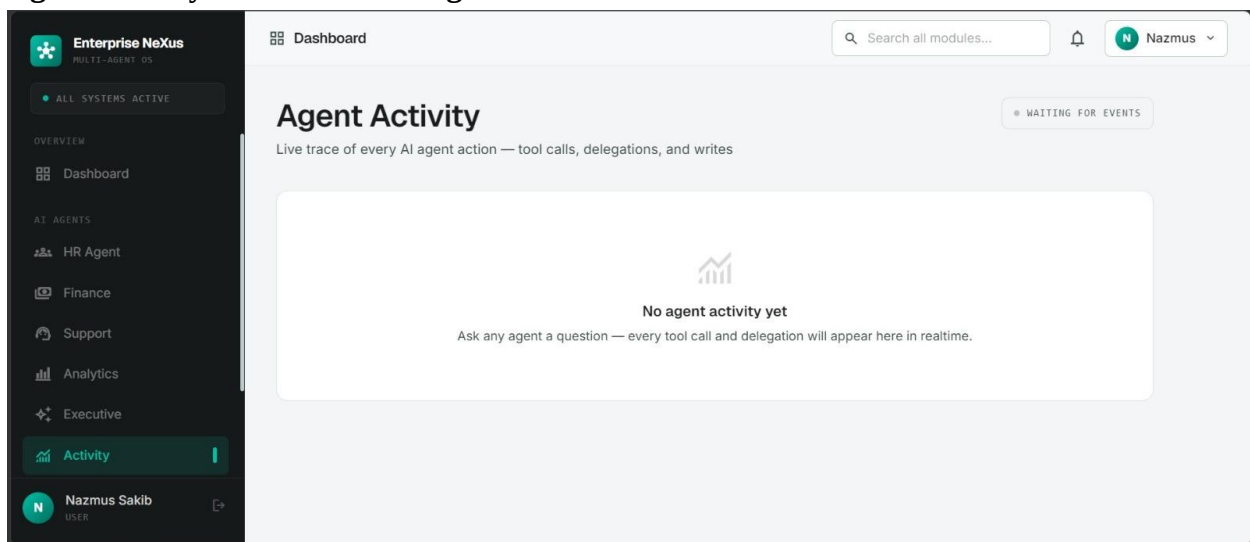

Executive Agent dashboard featuring the 'Ask the Executive Agent' natural-language Q&A box (powered by Gemini) plus live summaries pulled from HR, Finance, and Support modules.

Executive Agent — Prompt Example

Example of a natural language query being typed into the Executive Agent's AI ask box, demonstrating how a user can ask business questions in plain English.

Agent Activity — Live Trace Log

Agent Activity page providing a live trace of every AI agent action — tool calls, delegations, and writes — used to verify and debug backend AI integration.
